Re: Fairfax Water Project 2378 Division 1  
I-495 Capital Beltway HOT Lanes Water  
Main Relocations and System Improvements

Dear Resident/Property Owner:

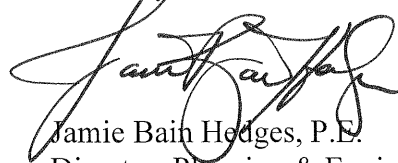

Fairfax Water is scheduling a public meeting to discuss proposed water main relocations and system improvements that are being constructed within the proposed Capital Beltway HOT Lanes project. This water main construction is necessitated by the proposed roadway improvements and is being funded by Fluor-Lane, LLC in conjunction with the Virginia Department of Transportation. Fairfax Water is conducting this informational meeting so that all property owners affected by the water main construction activities included within this roadway project are better informed. The proposed water main improvements will be subject to a public hearing by the Fairfax County Planning Commission in May, 2008.

The majority of the proposed water mains will be constructed within the roadway right of ways. However, a few property owners will have water main construction adjacent to or on their properties. The attached sketch depicts the proposed water main locations in the vicinity of your property.

The public meeting has been scheduled for Wednesday, April 9, 2008 at 7:00 p.m., in the Board Room of the Fairfax Water Morin office building located at 8570 Executive Park Drive, Fairfax. Representatives from Fairfax Water will be available to discuss water main construction details and project schedules.

Should you have any questions concerning the project or the forthcoming meeting, please contact Kathy Smedley at 703-289-6378. We look forward to your attendance at this meeting.

Sincerely,

Jamie Bain Hedges, P.E.  
Director, Planning & Engineering
